

Environmental Policy

The aim of W. Cawthorne & Son Ltd is to be an environmentally friendly company. We are aware that some of our processes may have a negative effect on the environment. On our workplace, local environment and globally and we aim to reduce this effect.

As a consequence of this, management are committed to continuous improvements in environmental performance and the prevention of pollution. Environmental regulations, laws and codes of practice will be regarded as the minimum standards for environmental performance.

We ensure that we have assessed our immediate environment and the impact of our actions whilst carrying out our operations. All staff are aware of the processes operated within the company and of the procedures to be followed to show compliance with the standard.

We will implement our policies through a co-ordinated environmental management system. Where unsatisfactory environmental performance is identified or anticipated, corrective or preventive action will be undertaken.

We will consider the environmental impacts of our products at all stages of their life cycle – from design, to manufacturing, customer use and final disposal.

All staff are encouraged to provide input to the development and improvement of the systems.

We shall put into place annual objectives aimed at the improvement of our environmental impacts and improving our environmental processes.

We continue to place importance on wider aspects of environmental performance and to discuss and participate in relevant issues with external agencies, suppliers, customers and neighbours.

We will conduct an annual self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations

Michael Cawthorne

Managing Director
